

Alliance Minéral^{Ng}

Mineral supplement

The nutrition of horse is important for performance and health. The horse's metabolism is often due to a unbalance of the feed.

Alliance Mineral Ng has been formulated to bring and maintain a balanced ration in micronutrients necessary for the proper functioning of metabolism.

The innovative formula of **PX SANTOX** has been developed in exclusivity by Alliance Equine laboratory. This additive allows to secure the formula thanks to its apport of yeast walls efficient against pathogens agents (mycotoxins).

The complex of flavouring compounds (Milk Thistle and Ginkgo Biloba) in formula contributes to a better detoxification of the organism favoring recovery.

Alliance Mineral Ng supports the organism to allow the athletic horse to express fully his sportive potential.
